

### FEATURES

MeM Prime is produced following a new technology, which involves cold micro-extrusion and marumerization. The purpose of using this innovative technology is to ensure a full water stability of soluble and insoluble nutrients in the feed while avoiding the use of chemical binders.

### BENEFITS

- Preventing denaturation of essential nutrients.
- Homogeneous particle size facilitating the consumption by the fish.
- Lower leaching preserving the water quality in the nursery tanks.
- Micro-cold extruded product.
- Marumerized product.
- High stability in water.
