

## Complete feed for fish larvae, early weaning

### FEATURES

Nori is an agglomerated feed, composed of the finest marine protein meals. The feed is high in proteins and moderated in fat, which preserves hepatic conditions and promote fast growth. This perfect nutritional balance covers most of fry physiological needs. The essential fatty acids are from protein fraction, as no tri-glycerides oils have been added.

### BENEFITS

- Stable in water and an excellent buoyancy.
- Covering most of fry physiological demand.
- Recommended for all marine and freshwater fish species.
- Agglomerated diet.
- High protein level.
