

FEATURES

Algae Paste Prime is a vitamin-enriched high quality *Chlorella* paste, developed specially for rotifer feed and green water technique. The product contains pure *Chlorella* cells (*Chlorella* sp.).

These algae are known to have a very high content of active enzymes, vitamins and minerals, all concentrated in a size of 2 – 8 µm diameter.

Product produced in the EU that improves logistics and freshness of the algae.

BENEFITS

- **Production and freshness:** *Chlorella* sp. cells are produced on-demand, and delivered within 3 to 5 days post-production, ensuring top freshness.
- **Concentration:** Algae Paste Prime is a pure highly concentrated (minimum 17.5 ± 2 % dry weight) *Chlorella* sp. cells product, thanks to its high technological cultivation / centrifugation process.
- **Logistics:** Thanks to the EU-located manufacturing site, heavy bureaucratic customs' processes for logistics and transportation are not required.

COMPOSITION

Nutrient (per 100g of dry matter)	Unit	Value	Nutrient (per 100g of dry matter)	Unit	Value
Protein	%	45.0	Vitamin B12	µg	650
Lipids	%	12.0	Vitamin B1	mg	1.0
Carbohydrates	%	32.0	Vitamin B3	mg	6.0
Minerals	%	6.0	Vitamin C	mg	43.0
PUFAs	%	5.0	Vitamin E	mg	24.0

INGREDIENTS

100% *Chlorella* sp.

INSTRUCTION OF USE

Please use within 45 days of production date. Product based on natural ingredients. Variation in color is possible but does not affect the performance.

**Adjust feed amounts according to local conditions.*

PACKAGING

Jerrycans of 20.0 L; Cubitainer (Styrofoam box) of 20.0 kg.

STORAGE CONDITIONS

Store in cooled place between 2 °C to 6 °C without freezing the product.

Shelf life: 45 days.
